Median company operating margin across three industry periods

EDA Software had the highest eleven-year median (40.5%); IDM changed most in 2023-2025 (-9.15 percentage points versus 2022).

Note: Bars show the median operating margin across valid company-year observations within each period. Operating margin is operating income divided by revenue. Results describe represented companies only and may be influenced by company composition, product mix, accounting practices, and limited coverage in smaller groups.
